Commercial building roof Maintenance Program

We would like to offer to our customers a prevention plan which consists of 24 hour emergency maintenance service for any natural or unnatural breakdown.

This where we have an annual fee to service your facility with monthly inspections, assess damage and prevent any further damage from occurring. With a flexible rate per square foot and a preventative service plan for each individual we can get you and your building back on track.

A copy of a monthly inspection will be submitted within three days of inspection to the appropriate person of your facility(ies).

All prices are flexible and negotiable and generally depend on level of deterioration.
